Terralord

I MASTER MY WORLD
Terralord

TERRALORD PICKUP, HIGH PERFORMANCE OFF-ROAD PICKUP

Fully upgraded Terralord with automatic transmission and high off-road performance has spearheaded the high-end pickups segment to a new level.

HIGH TRAFFIC-ABILITY, LARGE LADEN CAPACITY

- Professional high-performance off-road chassis with the highest off-road category.
- Synchronous development with international standard, assured warranty of 3 years 100,000 kilometers.
- Widened and thickened frame, precise steering system.
- Snowfield, sports, ordinary operating modes, easily switchable.
- Eton differential lock equipped for a better off-road de-trapping capability.
- Up-hill driving as easily as driving on flat grounds.

Terralord

A side-profile photograph of a blue pickup truck, likely a Toyota Hilux, parked on a paved surface. The truck is the central focus, shown from the side. In the background, there is a body of water, a bridge, and a city skyline with several high-rise buildings under a clear sky. A large tree is on the right side of the frame. In the top-left corner, there is a close-up, angled view of the truck's front grille, showing its honeycomb pattern. A red vertical bar is positioned to the left of the text block.

Specifications: 5341mm x 1885mm x 1815mm;
Wheelbase: 3230mm; Fashionable and the
continuation of Grand Tiger aggressive design;
Exterior streamline design is hard and refine.

AMAZING TERRALORD

AN EXCELLENT EXTERIOR

The Terralord features a regular four-door cab short bed with a full chrome mask. Still, it does have some more distinctive headlamps, with two vital optical classes, side indicators, and daylight LED strip, along with some "angel eyes" type blue rings, which are real beauty.

Its side is even more detailed and specific pick up design, wherein this segment we can assume that nearly all trucks are identical. The rear is also reminiscent of the blue oval vehicle, and its taillights are more modern, integrating LED lights for positioning and braking.

It has a chrome roll bar as well as hooks on the outside side of the cargo box that are very useful if you tie it from one side to the other, especially when you go outdoors. The latest Terralord showed powerful motorization with a more than substantial torque, with an excellent run, tested in the steep hills of high mountains and various difficulties.

LED HEADLIGHTS

The headlights now deliver LED Hi-beams and have been updated to have a more sophisticated look, while still adding a character line that blends with the enhanced front grille. The LED fog lights that are available complete its hostile disposition.

DEPENDABLE WHEELS

It has 17-inch wheels, wearing 265/70 Hankook tires, all ground rubber, something admired for its look, and improved grip on all terrain.

PLEASURE TERRALORD

FUNCTIONAL EQUIPMENTS

Its equipment is full, incorporating from front fog lamps, chrome exterior mirrors with turn signals and electrical folding, chrome treads, chrome details on handles and mirrors, front and rear parking sensors along with a 360° camera system.

GENEROUS DIMENSIONS

The exterior dimensions are generous, with a total length of 5341mm, 1885mm long, and 1815mm high. The load capacity is 855kg, with a ground clearance of 200mm minimum. The capacity of the fuel tank is 75 liters, adequate to provide good autonomy.

TECHNICALLY SHAPING

The Terralord blurs the distinction between shape and function. Every interior design is designed to enhance the driving experience. And with adventure always on the horizon, the inside view is still as amazing as where you are going.

INSIDE COMFORT GOES ALL OUT

Comfort with Dual-Zone Automatic Climate Control and Air Vents is still top of the mind. Also, the power driver available and the front passenger seats make the leg-room a no-brainer.

ELECTRICAL ADJUSTABLE (10 DIRECTIONS) HEATING SEAT

There's plenty of comfort in riding around with the regular heated front seats available from the Terralord.

POWER FOLDING SIDE MIRRORS

Available power-folding side mirrors come in handy not only when parking is close, but also in busy areas for added vehicle safety.

ELECTRIC PARKING BRAKE WITH BRAKE AUTO HOLD

These models are fitted with an Electric Parking Brake to help prevent your Terralord from shifting when parked. The conventional manual parking brake lever is replaced by a convenient, simple switch on the center console. Auto Hold is an extension of the Electric Parking Brake feature when turned on, keeping the Outlander steady at traffic lights-even though you remove your foot from the brake pedal. Pressing the accelerator activates the brakes, and you're going in.

9-INCH LARGE SUSPENSION LCD SCREEN

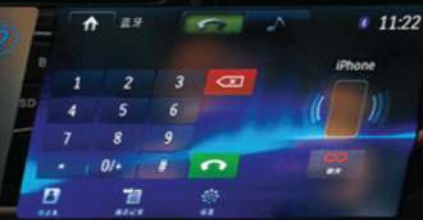

Integrating MP5, Bluetooth, radio, 360 panoramic images, Careland navigation systems and mobile internet smart interactive systems, greatly enhancing entertainment and interactivity

POWER AND OFF-ROAD

PROFESSIONAL, DEDICATED, HONORED

- "Champion in the Manufacturer Group of 2018" Urat Off-country Rally
- "Second place in the Diesel Manufacturer Group" of 2017 COC Huairou Station
- "First place in the Diesel Manufacturer Group" of 2017 COC Dazhai Station
- "First place in the Diesel Manufacturer Group"
"Best Manufacturer Team Award" of 2017 North Asia Rally
- "Champion of the Diesel Manufacturer Group"
"First place in the Diesel Manufacturer Group"
Cup of 2017 COC Qinglong Station

**OFF-ROAD CHASSIS,
HIGH TRAFFIC-ABILITY,
HIGH LADEN CAPACITY**

The model can be used as an off-road vehicle on off-road roads and as an SUV in cities and expressways.

POWER TERRALORD

ISUZU

POWERFUL

Equipped with the most advanced 2.5T ISUZU diesel engine; Low speed large torque in enabling an instant powerful burst. With Europe VM technology, 17.5 high compression ratio, maximum output 100KW. 320 N.m peak torque can be obtained at 1800rpm.

HIGH EFFICIENCY

Terralord has Double overhead camshaft, lightweight aluminum alloy piston, BOSCH electronically controlled high pressure common rail system, precise control of fuel injection.

LOW NOISE

Hydraulic tappet actuated valve, dual-mass flywheel power output, Belt rotation, minimized noise and vibration output.

6-SPEED AUTOMATIC TRANSMISSION

Originated from the 50 years of automatic transmission technology transfer of Punch Company, France, with stable and reliable quality. After 2 years of calibrating and adjusting with VM engine in France, the engine has a quick start response, a smooth shift changing and excellent fuel efficiency. The transmission has produced more than one million sets and is equipped in the international luxury brands such as BMW and Cadillac.

HIGH STARTING ACCELERATION, LOW TORQUE AND STRONG POWER

Professional high-performance off-road chassis with the highest off-road category. Synchronous development with

Cadillac

6-SPEED AUTOMATIC TRANSMISSION

OFF-ROAD STRENGTH

international standard, assured warranty of 3 years 100,000 kilometers. Widened and thickened frame, precise steering system. Snowfield, sports, ordinary operating modes, easily switchable. Eton differential lock equipped for a better off-road de-trapping capability. Up-hill driving as easily as driving on flat grounds.

and a solid steel 7-horizontal tapered trapezoidal frame with segmental energy absorbing and local reinforcement functions is more solid and stronger in load bearing.

STRONG IMPACT RESISTANCE AND GOOD SAFETY

Low lateral inclination when turning at high speed and a strong sense of integral assembling; Strong ability to cross bumpy roads, easy driving on roads with complex road conditions; Stable chassis, and accurate orientation.

INTERNATIONAL LATEST "8TH GENERATION FRONT SUSPENSION"

(DOUBLE WISHBONE + COIL SPRING + TORSION-BAR SPRING) Comfortable Driving, and it's off-road pick up in off-road condition, and SUV in urban and high speed road.

STRONG ABILITY TO ACROSS BUMPY ROADS, STRONG OFF-ROAD PERFORMANCE

The upper and lower swing arms of the front suspension have width up to 259mm and 430mm respectively, and the distance between the upper and lower swing arms is 458mm, which can ensure the off-road traffic-ability and stability; The thickened stabilizer bar has a diameter of 30mm which can enhance the lateral stability of the left and right wheels on bumpy roads, maintaining the balance of the vehicle body and ensuring the comfort of both driving and riding.

HIGH SPEED TURNING, SMALL TILTING

STABLE CHASSIS, PRECISION STEERING

MORE PROFESSIONAL WIDENED AND THICKENED OFF-ROAD CHASSIS

The widened and thickened frame is reinforced; The key part of the girder has a cross section of 155mm. 2-longitudinal

LOADING CAPACITY, MORE THAN 30% UP

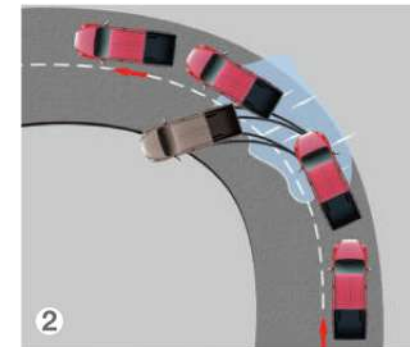

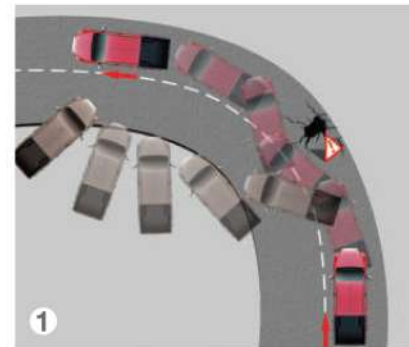

CONSIDERATE PROTECTION AND GRADE ENHANCEMENT

- First manufacturer with ESC/TCS standard configuration in all series; EBA brake assist, HAC hill-start assist control.
- Expansion on pickup safety features dynamic with considerate safety design!

SAFETY TERRALORD

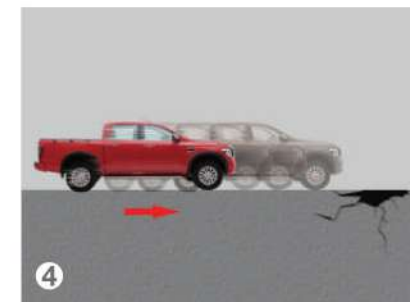

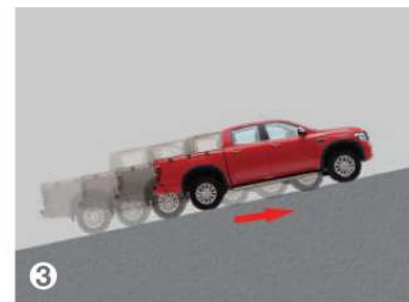

ESC VEHICLE STABILIZING SYSTEM ①

Through braking of the external front wheel / internal rear wheel, enable the vehicle to reroute back its original path when turning.

TCS ANTI-SKID CONTROL SYSTEM ②

It ensures the optimal traction effect by the vehicle under various running conditions, brakes on idling wheels in preventing loss of driving force.

HILL-START ASSIST CONTROL ③

To prevent difficulty in hillstart, braking force is temporarily applied to the four wheels in preventing the vehicle from sliding downwards.

EBA (BRAKE ASSIST) ④

In responding to the driver's braking action, the braking force is increased during emergency braking, thereby shortening the braking distance.

SAFETY AIRBAG AND SIDE AIRBAG OF DRIVING SEAT ⑤

Driver Assistant Airbag and Front-Side Airbags (For Luxury model)

TIRE PRESSURE / TEMPERATURE MONITORING ⑥

It digitally measures and monitor tire pressure and temperature that makes you feel safe and preventing accident.

WORRY-FREE SERVICE, CONSIDERATE PROTECTION

Greatly enhancing the safety performance of the complete vehicle, and further expanding the safety dimension of pickup models.

HIGH-STRENGTH BODY

Reinforced "3H" cagebody design. High-strength plate proportion 56.3%. Strong impact resistance, more safety and durability.
